

Sustainability

Policy

Together we strive to be better every day by committing to reduce our environmental footprint and working proactively to respond to global sustainability issues. We recognise that sustainable practices need to be embedded in the way we work, and we believe that this will contribute to long term business success.

Together we will:

- Implement projects and programmes that improve our energy efficiency and reduce our CO2 emissions.
- Reduce our disposal of waste to landfill and work with our supply chain and customers to ensure efficient use of resources, with reduced waste and increased recycling of waste materials.
- Improve our water efficiency and minimise the impacts from water discharged from our operations.
- Offer innovative, practical solutions to customers to enable their buildings and infrastructure to be sustainable.
- Support industry education on sustainable construction practices, design principles and measures.
- Identify opportunities to reduce environmental footprint (e.g. life cycle assessments).
